PROFILE

I am a Software Engineer who is passionate about growing and evolving in a team environment.

I come from an Audio Visual background where I would set up audio, lighting and vision technology and operate the equipment in show with a team of colleagues. Most of the work was client facing and so I am well versed in explaining technical lingo to clientele.

SOFTWARE ENGINEERING PROJECTS

TIC-TAC-TOE

- The popular 2 player game also known as noughts and crosses
- Tech Stack - HTML, CSS, JavaScript and JQuery
- https://github.com/StaceyBros/tic-tac-toe

SKYDIVING APP

- An Events app for skydivers so that they can look up the locations of dropzones in Australia and add events to their profile
- 4 models with 3 CRUD systems made in Ruby on Rails with vanilla CSS
- https://github.com/StaceyBros/Project01

WORK EXPERIENCE

FREELANCE AUDIO VISUAL ENGINEER | 2018 - 2020

- Collaborated with new teams at different locations every day to set up and operate shows in venues such as Carriageworks, Olympic Park and the Hyatt Regency, Darling Harbour.

SENIOR TECHNICIAN - ENCORE | 2014 - 2018

- Managed a team of four technicians when setting and operating shows in the Westin hotel.
- Conducted preproduction for shows as part of a cross functional team in order to best achieve the client's vision for an affordable price.
